

NEW PRODUCT RELEASE

1/24 ASPHALT LATE MODEL

RTR

1RC Racing proudly launched its journey with the 1/18 Midget car, and since then, we've passionately expanded our brand to embrace the thrilling world of oval motorsports through our 1/18-scale race cars. We're excited to take the next step in our journey by introducing a new scale of oval racers—enter the 1/24th! Our latest creation, the 1/24th Asphalt Late Model, truly reflects the spirit and enthusiasm of our brand. Just like its larger counterpart, this design is sure to resonate with every racing fan who appreciates the artistry of scale modeling. The best part? The 1/24 Asphalt Late Model Ready-To-Run allows you to share exhilarating racing moments with family and friends, even in smaller spaces or on your existing 1/18th tracks. Join us in this exciting new chapter, and let's keep the fun and competitive spirit of racing alive together!

CHASSIS

The 1/24th Asphalt Late Model chassis is designed to mimic the look, tuning, and driving experience of a full-size race car. It features a realistic tubular-style chassis with a centrally mounted battery, which enhances balance for both oval and road-course racing. The front suspension is designed in an A-arm style, equipped with aluminum shock bodies and adjustable front spring platforms that allow for spring preload adjustments. Additionally, the front caster is independently adjustable.

The rear axle assembly utilizes a solid direct-drive axle with a compound gearset and a locked gear ratio to ensure competitive spec-type racing. It also includes high-impact composite radius rods, a Panhard bar, and threaded, adjustable coil-over friction shocks, also featuring aluminum shock bodies.
